ONE80 INTRODUCTION

Our world is changing at an incredible speed, advancements in technology, blockchain and a host of innovations and disruptive entities reach every corner of the planet. Decentralised Finance (DeFi) is already transforming how people and organisations invest, borrow, manage, spend and move money. There is a global consensus that cryptocurrencies will play a fundamental role in world finance, and many people regard the existing financial systems as not fit for purpose and not available to all.

One80 Mission

The brand name One80 originated from the world's 180 currencies across 197 countries, our logo represents 7 continents and the connections between them, and their countries.

One80 was created to integrate blockchain technologies and crypto services into businesses and people's lives across every country. We will provide simple, easy-to-use products and services, which add value, we will make finance effortless, without borders, by enabling instant access to DeFi solutions, needed to create a better financial system and improved financial benefits.

One80 will leverage blockchain and additional technologies to support demand and global financial needs, we will enable the transition from traditional Fiat Currencies to Digital Currencies, and our network and offering will reach every corner of the globe. With your help, One80 will build a world-class decentralised ecosystem and develop products to meet the financial needs for today and the future.

CRYPTOCURRENCY CHALLENGES

There are some challenges associated with crypto exchanges and the crypto industry, including Centralised Exchanges losing investors' money and scam coins. One80 will develop, monitor our systems, and manage our platform, products and services and overcome associated challenges to prevent and ensure:

Safety & Security

One80 will help make DeFi a safer place and contribute to the development of safer worldwide DeFi solutions for all.

We will ensure One80's security weakness and exposure to hacks are mitigated and avoided. One80 will build and develop to high standards, and we will be audited, and penetration tested. Our teams will build cryptocurrency and blockchain systems to the highest security standards, ensuring a safety-first ethos.

One80 is completely decentralised, allowing you to make decisions about your crypto when you want. One80 DEX connects to your wallet directly so that you control it.

Why should you use DeFi? Centralised exchanges (CEX) have access to your assets, making it possible for them to move and use your money, your funds are at risk if something goes wrong. One80 users and their community do not have these risks or issues due to working in a decentralised way.

All transactions within our protocol will be monitored. When One80 is used, there is no likelihood of human error since smart contracts are used to run the platform.

Privacy

Decentralised finance has anonymity. People who use Decentralised Exchanges (DEX) remain anonymous since they do not have to reveal personal or private information to the exchange. With Centralised Exchanges (CEX), various authorities can access your personal information and exchange history, and require that you provide personal documents to exchange your assets

Restrictions

When you use a Centralised Exchange, you are exposed to regional policy restrictions and changes at any time, which can result in shutdowns that restrict or block access to your crypto assets.

Decentralised Exchanges are different. A Decentralised Exchange is invulnerable to regional changes or adverse decisions and does not affect the One80 exchange directly.

Systems and technical architecture

One80 exchange will be developed with security, efficiency, speed, and scalability as a priority, to ensure long-term success. Our team's experience in building and maintaining quality DeFi systems will shape the One80 ecosystem to ensure its global success and ease of use, and we will adopt a continuous improvement methodology across every aspect of what we do.

Automated market maker (AMM)

One80 will use smart contracts known as automated market makers (AMMs) to manage our products and services. Using an algorithm, AMM maintains fair negotiation between two parties. AMMs are smart contracts that conduct negotiations and transactions without an order book. AMMs have been used successfully to manage and increase the liquidity of coins and tokens in the cryptocurrency space.

Market liquidity

One80 is already developing partnerships with organisations within Decentralised Finance, to ensure we add continued value to our community and users. Our team and partners have the right blend of industry experience and resources, and our selected partners will support the One80 DEX and provide forms of liquidity and improved product and service offerings.

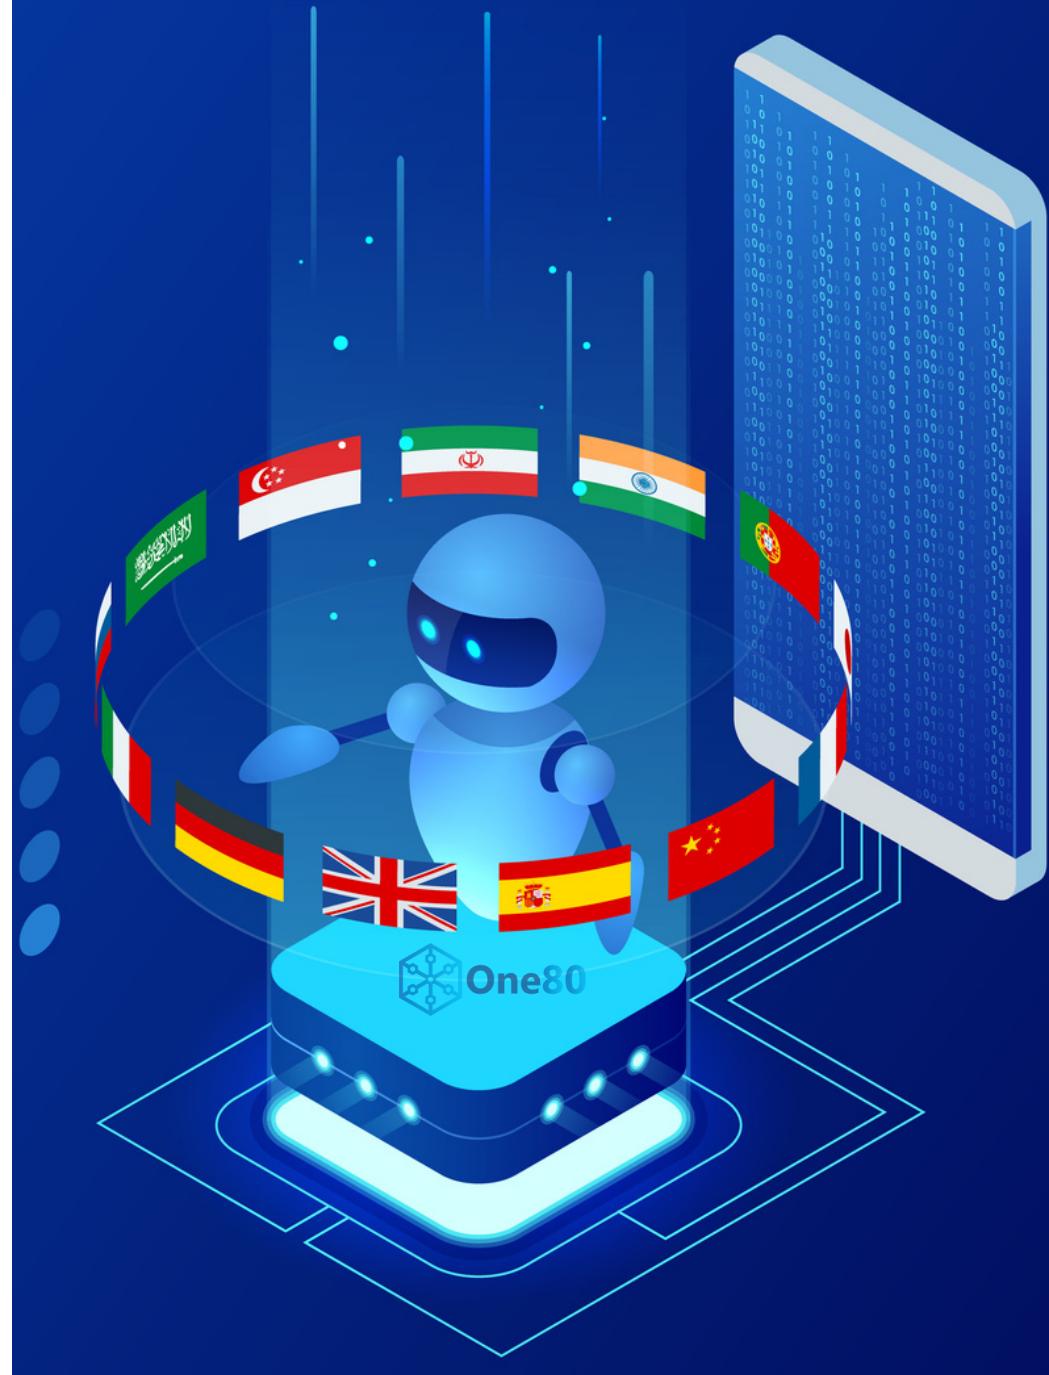

Customer service

We understand people want and expect in the DeFi space, and we listen to our community and users to ensure we stay connected and support all who are part of the One80 journey. If you are looking to trade, earn or hold crypto currency, we will ensure your experience with us is the best experience available, with One80 troubleshooting, advice and guidance available to all, online.

Internationalisation and language support

Blockchain and One80 are global, most exchanges focus only on one language or country. The One80 platform is worldwide, with language options and an international team that has extensive working experience in Europe, Asia and the Americas, we can seamlessly support the global market using a blend of automation and local geographic knowledge.

FEATURES, PRODUCTS AND SERVICES

One80 planned rollout of new products and services is not an exhaustive list and in no specific order, One80 DeFi developments, integrations and improvements will be developed to meet user requirements and demand. We will be much more than just a crypto trading and staking platform.

- Decentralised Exchange, Liquidity, Farms and Pools (Ethereum Network)
- Fiat payment gateways
- Stablecoins
- NFT marketplace
- Virtual cards and payments
- Advanced trader tool upgrades and leverage
- Multichain integration
- Cross-chain bridging
- One80 wallet
- Proof of physical work
- Vaults
- Lending

One80 long-term vision and goals

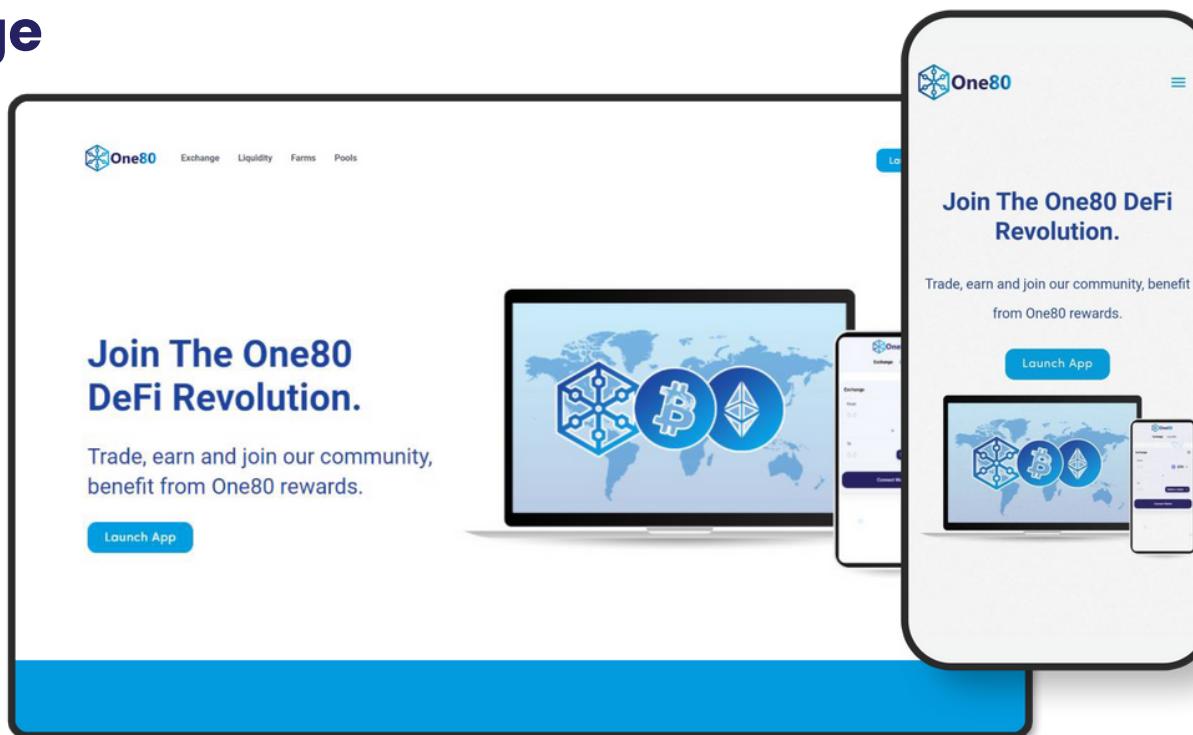

One80 has a longer-term plan, a secret strategy, and a road map, which is not in the public domain, the reason for the secrecy is to ensure our long-term aspirations and goals are not replicated elsewhere, when the time is right, we will let the world know of these exciting improvements and opportunities!

4

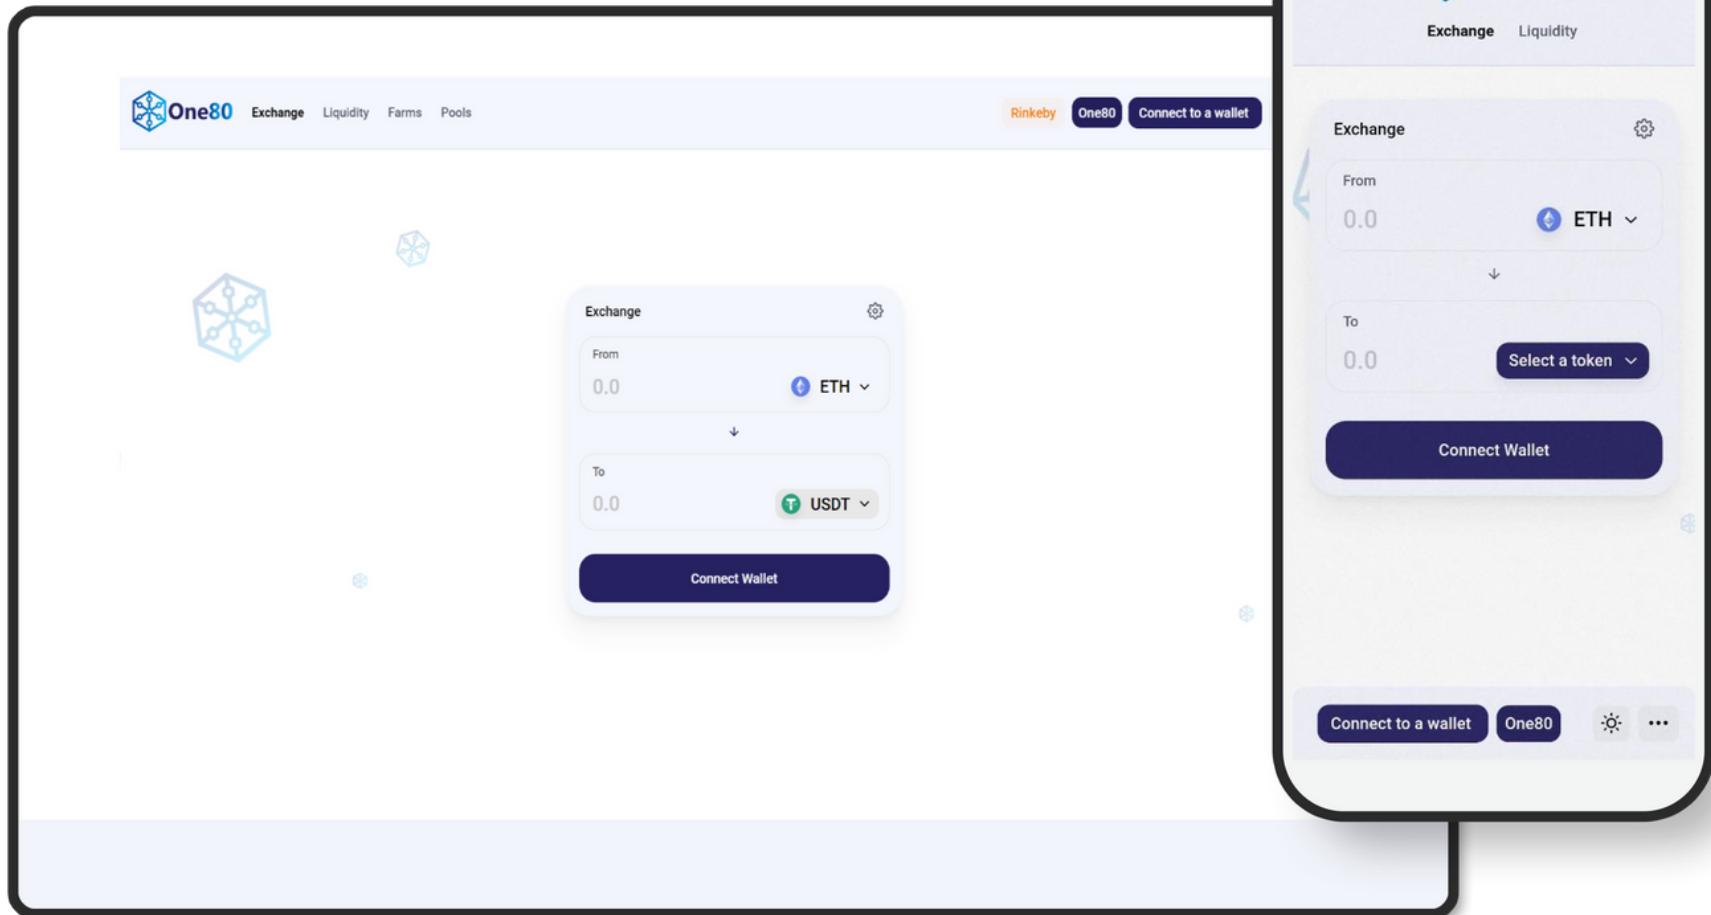

EXCHANGE, POOLS, FARMS & LIQUIDITY (V1 SCREENSHOTS)

Ethereum blockchain has been chosen to be utilised and adopted by One80 first. The following visuals and screenshots show how the One80 platform will look:

Web and mobile UI Preview Landing page

Exchange

Pools

The screenshot shows the One80 Pools interface. At the top, there is a navigation bar with the One80 logo, Exchange, Liquidity, Farms, Pools, Goerli Testnet, 0 One80, Connect Wallet, and a light mode toggle. Below the navigation bar, the title "Pools" is displayed, followed by the sub-instruction "Stake tokens to Earn One80". There are three filter buttons: "Staked only" (unchecked), "Live" (checked), and "Finished". A search bar labeled "Search Pools" and a "Sort By" dropdown are also present. The main content area displays a single pool entry for "ONE80". The entry includes the token icon, APY (300%), Earned (0), Deposit Fee (2%), and ONE80 EARNED (0). A blue "Unlock Wallet" button is at the bottom. A "Details" link is located at the bottom right of the pool card.

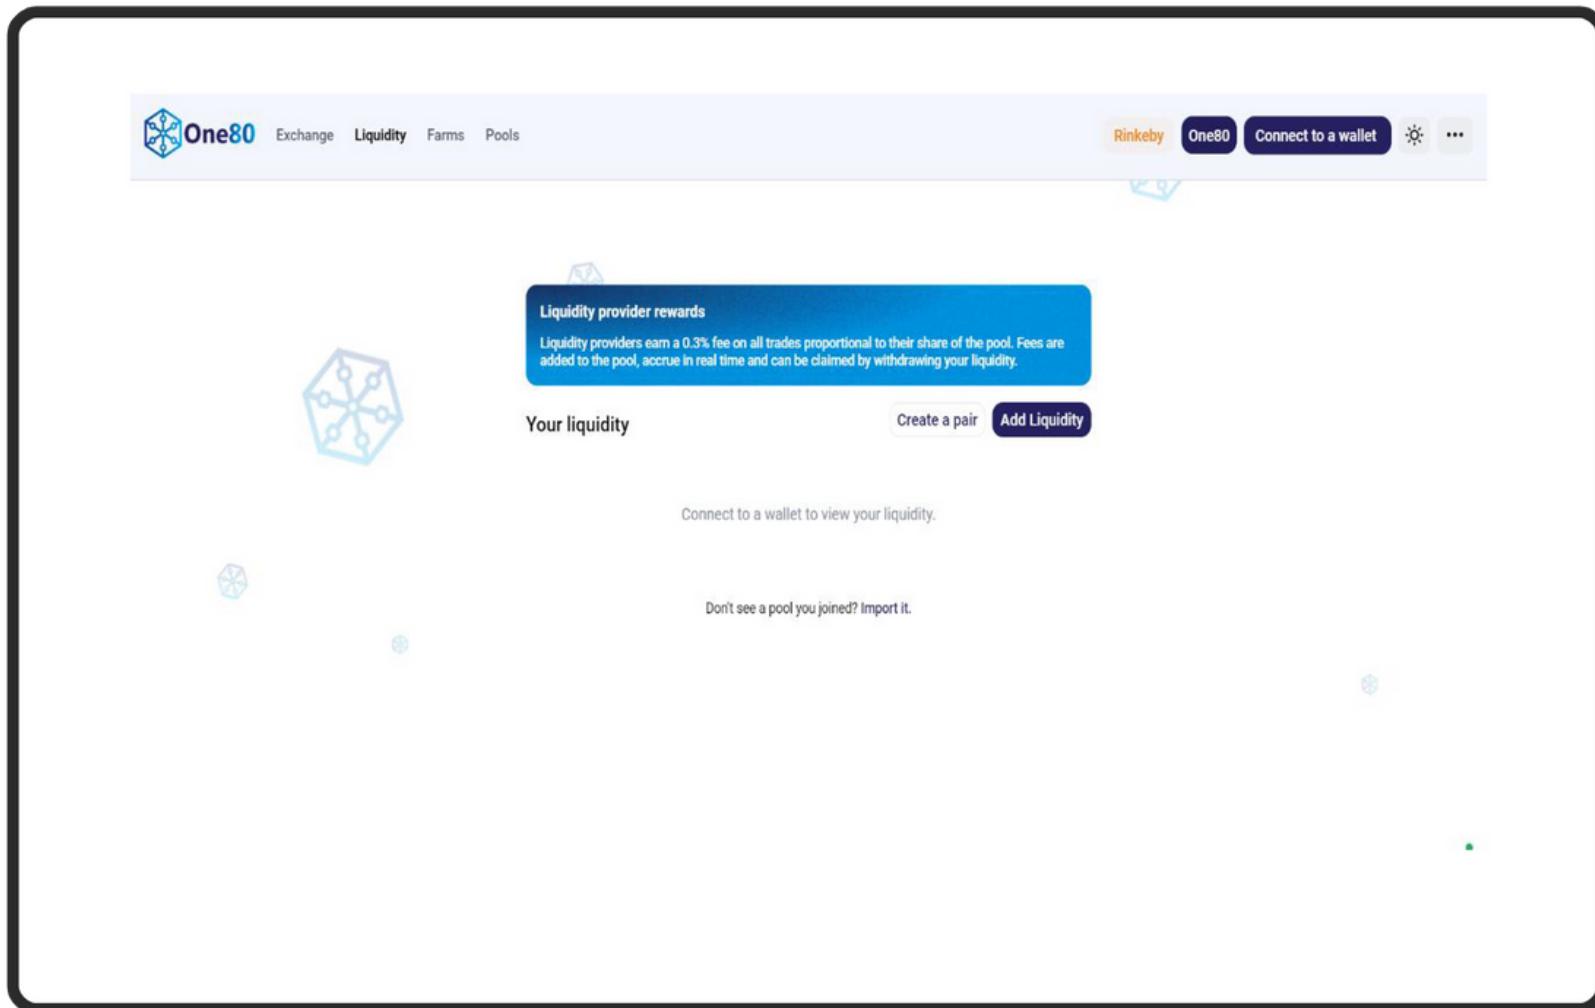

Farms

The screenshot shows the One80 platform's Farming section. At the top, there are navigation links for Exchange, Liquidity, Farms, and Pools. On the right, there are buttons for Goerli Testnet, 0 One80, Connect Wallet, and a light mode toggle. The main area is titled "Farms" and features a sub-instruction "Stake LP tokens to Earn One80". Below this, there are three cards representing different liquidity pools:

Pool	Symbol	APY	Earned	Deposit Fee:	Action
ONE80-DAI LP	DAI	300%	0	2%	Unlock Wallet
DAI-USDC LP	DAI	300%	0	2%	Unlock Wallet
ONE80-ETH LP	ETH	300%	0	2%	Unlock Wallet

Each card also includes a "Details" button at the bottom.

Liquidity

Liquidity

The image displays the One80 platform's user interface for liquidity providers, shown on both a desktop browser and a mobile device.

Desktop View: The main header includes the One80 logo, navigation links for Exchange, Liquidity, Farms, and Pools, and network status (Rinkeby). Below the header is a large, light blue hexagonal graphic. The central area is titled "Add Liquidity" and contains two input fields: one for "Input" (ETH) with a value of 0.0 and another for "Select a token" with a dropdown menu. A "Connect Wallet" button is at the bottom. A tip box states: "Tip: When you add liquidity, you will receive pool tokens representing your position. These tokens automatically earn fees proportional to your share of the pool, and can be redeemed at any time."

Mobile View: The mobile interface has a similar header with the One80 logo, Exchange, Liquidity, and Connect to a wallet buttons. It features a prominent blue box titled "Liquidity provider rewards" which explains the 0.3% fee structure. Below this are "Add Liquidity" and "Create a pair" buttons. A message encourages users to "Connect to a wallet to view your liquidity." At the bottom, it says "Don't see a pool you joined? Import it." and shows a small hexagonal icon.

5

ONE80 TOKEN

The native token is available on the One80 Exchange alongside other tokens and coins.

We will review, assess, and add coins that have strong credibility, user base, and liquidity. Anyone can add a coin or token to the One80 DEX, and we will run regular checks and assessments to ensure scam coins and tokens are removed to ensure the One80 community and users are protected from fraud.

Revenue Model

One80 revenue will come from the following sources:

Source	Description
Exchange Fee	One80 initially will charge a 0.1% to 0.3% fixed fee per transaction. Other variations will be subsequently introduced and 0% fee promotions will be offered.
Pools	A one-off deposit fee of 1% to 2% will be charged and other variations will be subsequently introduced.
Farms	A one-off deposit fee of 1% to 2% will be charged and other variations will be subsequently introduced.
Other Fees	There may be other fees that the platform collects for various products and services.

Inflationary mint and issue

We will issue tokens called One80. A limit of 200 million (Phase 1) One80 Tokens will be created and 44 million tokens will be used for investors and early adopters. One80 will run natively on the Ethereum blockchain with ERC-20 protocol standard.

One80 will be an Inflationary token, once phase 1 is complete and One80 can fully develop our products and services, we will issue a One80 token minting and issue schedule. We will keep you posted!

Benchmarks

Time vs Trigger Based

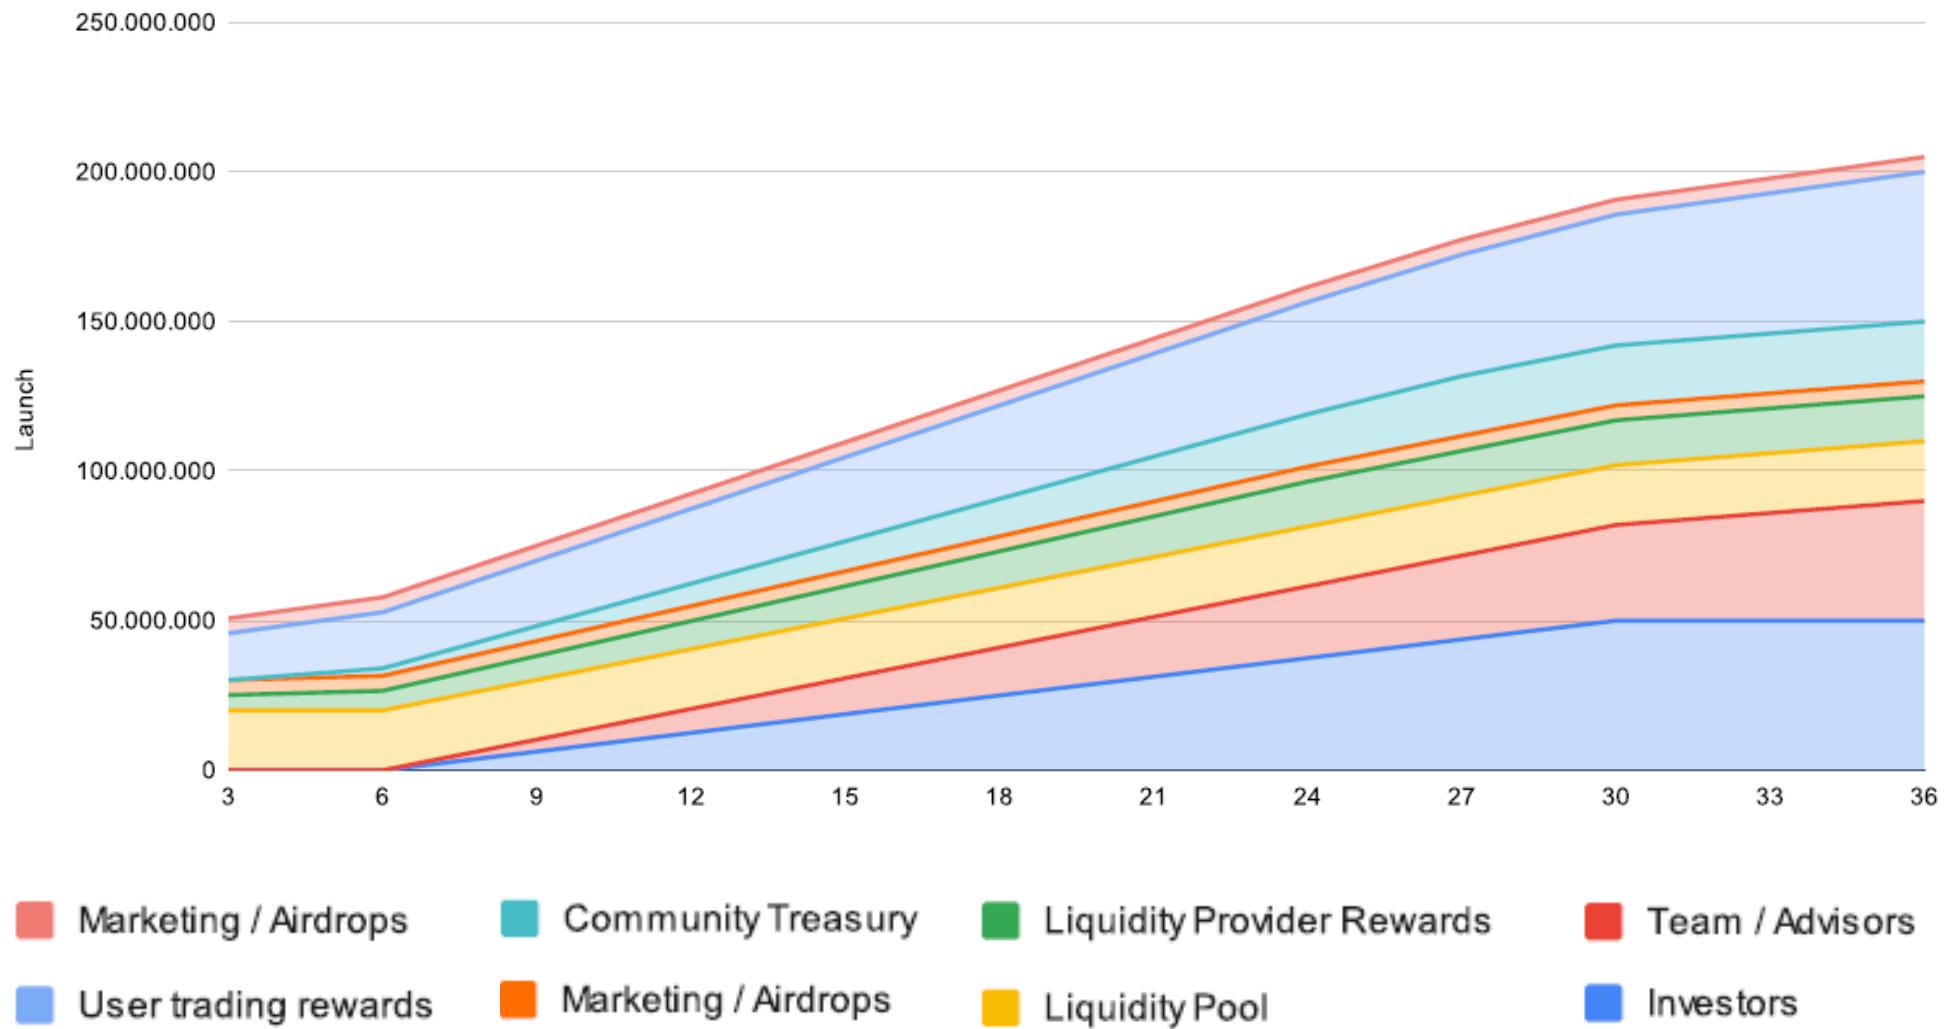

Linear Time Based = Less Volatile

Cliff = 0,65 year

Results suggest that a 6-month cliff is favorable to a 1-year or no cliff, and that somewhat counterintuitively, unlocking a higher proportion of tokens at the cliff is favorable to smaller unlocks

Vesting = 2,3 years

Token Vesting Chart

SUSTAINABILITY

One80 is committed to working towards Net Zero and achieving the following targets:

1. For the emissions that we control directly (One80 Carbon Footprint): net zero by 2040, with an ambition to reach an 80% reduction by 2028 to 2032.

2. For the emissions that we can influence (One80 Carbon Footprint Plus): net zero by 2045, with an ambition to reach an 80% reduction by 2036 to 2039.

One80 will adopt a continuous improvement approach to sustainability, we will support our communities and align our activities, to achieve sustainability best practices. We will support environmental, sustainability and carbon reduction projects globally.

CONCLUSION

The cryptocurrency industry is developing at an astonishing speed. Security and safety concerns can be overcome with decentralised finance, which gives people direct control over their funds and total control over their crypto assets.

One80 will be more than a token and exchange since our long-term development plans will create safe and secure global cryptocurrency products and services that are available to everyone and for everyone to benefit from, making a positive difference in the digital and real worlds today and for the future.

The One80 IDO will offer early adopters an exceptionally low One80 token acquisition opportunity that is not to be missed. One80 will offer first-class cryptocurrency and asset solutions to both businesses and people globally.

Join and benefit from One80 to create a decentralised world!
